BRITISH CHEMICAL ENGINEERING AND PROCESS TECHNOLOGY
VOLUME 16 **1971**

No. 1	JANUARY	pp. 1– 96
No. 2/3	FEB./MAR.	pp. 97– 264
No. 4/5	APR./MAY	pp. 265– 440
No. 6	JUNE	pp. 441– 560
No. 7	JULY	pp. 561– 656
No. 8	AUGUST	pp. 657– 736
No. 9	SEPTEMBER	pp. 737– 864
No. 10	OCTOBER	pp. 865– 976
No. 11	NOVEMBER	pp. 977–1080
No. 12	DECEMBER	pp. 1081–1168
Processes in Europe		pp. S1– S64

CONTENTS

Vacuum equipment for chemical processes 29
Liquid-ring vacuum pumps 37
Electrochemical reduction of CO_2 39
Purification of natural gas using the vortex effect 40
Reciprocating-plate extraction column 42
Pressure vessels for very high pressures 49
Concept of learning in the chemical industry 52
Lead molten-bed reactors 53
Multipurpose gas-liquid contactor 56
Graphical solution for the conditions of vapour-liquid equilibrium 57
Model for equilibrium rates in flashing flow through open channels, nozzles and short tubes 59
Modern trends in electrochemical industry 149
Industrial electrolysers for organic synthesis 154

(Cont'd overleaf)

Heat capacity of solids: A generalised model 160
Total height of fluidised-bed reactors 162
Experimentation at very high pressures 169
Evaluation of the pay-back methods by means of the DCF technique 171
The 8th TVA fertiliser demonstration 172
Chemical facilitation of gas transfer in liquids 175
Kiln design calculations 180
The Antoine equation and its use in distillation calculations 193
Cylindrical screen packings 197
Selecting a mechanical vacuum pump 202
Design procedures for pipelines transporting non-Newtonian fluids and solid-liquid systems 307
Optimum pipeline diameters by nomogram 313
Design and construction of plastics pipework systems .. 317
Corroded effluent pipes relined 323
Unit plot plans for plant layout 325
Difficult flow measurements 327
Review of two-phase flow literature 333
International licensing—the export of knowledge 353
Investment profitability and decentralisation 357
Vapour phase extraction processes 358
Mathematical modelling of chemical reactors 363
Combined convection of single phase turbulent flow within a vertical tube 367
Environmental aspects of engineering pollution control .. 368
Review of spray drying 370
Design of fluidised bed driers and coolers for the chemical industry 376
Thermal conductivity of organic liquids 382
Pressure vessel development—one year on 473
Preferred vessel and plate sizes 476
Optimising pressure vessels 478
Vessels in reinforced plastics 484
Recent developments in multilayer vessels 489
Optimising the design of multishell cylindrical pressure vessels 494
Safe design, construction and installation of pressure vessels 499
Economising in flanged joints 501
Dismantling a pressure vessel—the wrong way 503
Review of two-phase flow literature—II 511
Unit plot plans for plant layout—II 514
Forced convection heat transfer 593
Calculating the performance of a gas-fired coiled tube air heater.. 598
Simple breakthrough curves yield more information about fixed bed adsorbers 602
Gas fluidisation at pressures and temperatures above ambient 605
The Static Mixer as a chemical reactor 610
Sieving, straining and grinding 613
Model describing longitudinal hold-up profiles in mixed columns 617
Research management 619
Two case histories in the design of crystallisers 681
Formulation of linear programming models for plant operations planning.. 685
Effect of vertical vibrations on the pressure drop in a fluidised layer 691
Continuous vaporisation for drying organic liquids .. 696
Chemical engineering principles in medicine and biology .. 700
Effect of variation in the volumetric expansion coefficient on free convection heat transfer 704
Determining optimal fuel consumption in a process plant.. 705
Performance analysis in marketing planning 709
Electrical problems in the chemical industry 785
Heavy current rectifier equipment for electrochemical applications 795
Glass as a material of construction for chemical plant .. 796
Corrosion resisting materials and their applications .. 801
Developments in column equipment 807
Some present-day practices in vapour-liquid transfer equipment 813
Separation of aqueous-organic mixtures by pervaporation.. 817
General design algorithm for multistage countercurrent equilibrium processes 821
Some problems of captive use in the chemical industry .. 826
SI unit conversion factors for chemical engineers 829
Essential welding knowledge for the project engineer .. 905
Pressure vessel inspection by acoustic emission 912
Estimation of isothermal-isobaric vapour-liquid equilibrium data for methanol-ethanol mixtures 915
Effects of ultrasonic vibrations on the droplet size in spray columns 919
The determination of the heat transfer coefficient between a surface and a fluidised bed.. 922
Modular approach to simulation and design of complex systems 923
Capital investment for chemical plant 931
Project management in research and development 1009
Determination of the number of trays in a distillation column for separation of multi-component mixtures .. 1013
Absorber packed with orientated helices 1018
Production of α-olefines from a crude oil 1023
Algorithms for the optimal design of pressure vessels .. 1027
Pressure filtration or centrifugal filtration 1031
Ferralium—a new corrosion resisting alloy 1032
H-X data for alcohol-aliphatics 1036
Enthalpy-concentration diagram of the system acetone-carbontetrachloride 1038
Nomograms for estimating the composition of N and P_2O_5 based liquid fertilisers 1039
Selection of interest rate on capital for process design .. 1113
Improving the order book 1114
Commercial plant scale-up from laboratory data in the H-iron process 1117
Fibre formation from a melt by centrifugation 1119
Azeotropic systems, a rapid method of still design 1121
Algorithms for the optimal design of pressure vessels—II .. 1125
Glass as a material of construction—II 1128
Mass transfer with heat transfer 1133
Nitrobenzene as an extraction solvent for pyridine .. 1135
Decomposition of dichlorofluoromethane in the presence of steels 1137
